Personal Statement

AI Analyst with 4+ years delivering end-to-end intelligent automation and GenAI solutions across insurance, pharma, and consulting. Proven track record building LLM-powered tools, automation pipelines, and enterprise AI integrations deployed in production. Experienced in cross-functional stakeholder engagement from opportunity assessment through live deployment, with measurable impact on operational efficiency, cost reduction, and adoption across regulated industries.

Key Achievements

- **£30M+** quantified impact across 5+ Lines of Business and multiple countries through AI automation solutions *(Chubb)*
- **£500K** projected revenue uplift and **50%** increase in lead generation via automated data-driven go-to-market strategy *(Eqonic Group)*

Work Experience

Chubb London *Mar 2025 – Present*
AI Solutions Analyst

- Increased customer engagement by **42%** and sales conversion by **9%** across 3 products in 4 international markets by analysing AI-generated call transcripts, iterating sales scripts, and conducting structured A/B testing.
- Reduced policy quality-assurance turnaround by **89%** (45 minutes to 5 minutes) by leading analysis and delivery of a GenAI document-review solution adopted across 5 countries and 3 lines of business.
- Reduced operational and underwriting risk across a 20,000-policy portfolio by implementing an automated QA capability that uncovered a previously undetected **9% error rate**.
- Improved classification accuracy from **40% to 90%** by independently developing a GenAI-powered company-classification tool, later adopted by global teams for underwriting and portfolio audit activities.
- Delivered 10+ GenAI use cases from discovery to production by leading requirements gathering, user-journey mapping, Agile delivery, and stakeholder management.

Eqonic Group Limited *Jan 2024 – Feb 2025*
Business Analyst

- Designed and executed automated go-to-market strategy through A/B testing and market analysis; increased lead generation by **50%** and enabled acquisition of high-value clients, contributing to **£500K** projected revenue uplift.
- Automated SKU profitability reporting and procurement alignment analysis; implemented data-driven optimisation programme improving EBITDA performance by **12%**.
- Conducted customer behaviour analysis across browsing patterns, purchase frequency, and feedback; translated insights into targeted automated client proposals, boosting conversion rates by **30%**.

Eli Lilly and Company, Bangalore *Mar 2023 – Aug 2023*
Software Configuration and Development Analyst

- Identified process inefficiencies using Celonis process mining; partnered with finance team to implement automation interventions, saving **$250K annually** by eliminating redundant manual tasks.
- Led enterprise-wide deployment of WalkMe digital adoption platform across multiple business systems, driving **20%** increase in user engagement and **15%** reduction in onboarding time for new employees.

Eli Lilly and Company, Bangalore *Jul 2021 – Feb 2023*
IT Analyst

- Automated compensation workflows in Workday for 2,000+ employees using A360 robotic process automation

bots with data extraction and validation logic, reducing processing time from **3 days to 8 hours**.

- Evaluated and prioritised 100+ automation use cases; provided governance recommendations and data-backed reporting to global team managers and directors, driving **56%** increase in automation adoption.

Education

Cranfield University *Graduated Jan 2025*
MSc in Management

NIT Rourkela *Graduated Apr 2021*
BTech in Chemical Engineering

Skills & Competencies

AI & GenAI:	OpenAI API, Claude API, prompt engineering, GenAI workflows, RAG systems, LLM-powered tools, intelligent automation design, enterprise AI integration
Automation & Integration:	Python, n8n / Make, A360 RPA, API integrations, workflow automation, Celonis (process mining), WalkMe, process optimisation
Data, Analytics & Cloud:	SQL, data extraction and validation, A/B testing, business intelligence, Microsoft Excel, Azure, SharePoint / Teams integration
Governance & Compliance:	AI governance frameworks, risk evaluation, responsible AI practice, compliance documentation, adoption roadmap definition, risk assessment
Stakeholder & Delivery:	Cross-functional workshops, requirements engineering, business case development, Agile delivery, training delivery, change adoption
